

MANAGEMENT SYSTEM CERTIFICATION SCHEME REGULATIONS

1.3 MANAGEMENT SYSTEM CERTIFICATION SCHEME REGULATIONS

These Regulations set out BASEC's approach to the certification of the management systems of organisations. Separate Regulations set out BASEC's requirements for product certification. In order to be eligible for Product Certification and the award of a Product Marking Licence (which permits the use of the BASEC Registered Certification Trade Marks on products) it is required that the organisation achieves and maintains certification by BASEC to PCR Section 2.6, as set out in these Regulations.

1.3.1 Scope

Unless otherwise stated these Regulations apply equally to each of the following Schemes:

- a) Quality Management Systems to BS EN ISO 9001
- b) Environmental Management Systems to BS EN ISO 14001
- c) Health & Safety Management Systems to BS EN ISO 45001
- d) PCR Section 2.6 (necessary for a Product Marking Licence)
- e) Other Schemes for the certification of an organisation's management systems as offered by BASEC from time to time.

1.3.3 Eligibility for Certification

1.3.3.1 Certification by BASEC to the management systems Schemes set out above is available only to organisations operating within any of the following areas of scope:

- the manufacture of rod, wire, cable and cable accessories;
- the sale of rod, wire, cable and cable accessories;
- the manufacture and sale of components, materials or equipment associated with the manufacture and sale of rod, wire, cable and cable accessories; and,
- the provision of services associated with the design, manufacture, sale, installation, testing or recycling of rod, wire, cable and cable accessories.

1.3.3.2 BASEC will conduct an assessment of each application for the purposes of determining eligibility (as defined above). If BASEC determines that the activities of the Applicant are not within the scope defined above then BASEC may decline to process the application further.

1.3.3.3 An application may also be declined if the Applicant has had a previous certificate cancelled by BASEC under circumstances which would prejudice the reputation of BASEC.

1.3.3.4 Following assessment of eligibility, BASEC will issue to the Applicant a formal quotation for the processes of establishing and maintaining certification. The costs of preliminary assessment activities may be incorporated into the quotation or quoted separately. The terms of any quotation may be altered subsequently as more information is obtained about the Applicant.

1.3.3.5 Following acceptance of the quotation by the applicant, BASEC will begin initial assessment activities, which will be in a number of stages. As part of this process BASEC will conduct a risk-based assessment of each application against a number of criteria for the purposes of determining the acceptability of the application and the level of assessment activity required, including the ownership and organisational structure of the organisation, its establishment and facilities, professed capabilities, trading history, financial standing, and reputation. A fee may be charged for conducting this assessment. The outcome of this assessment will be communicated to the Applicant.

1.3.3.1 If BASEC determines that the application exhibits features such that the risk to the reputation of BASEC is substantial and that the application should not be accepted, then BASEC may require additional assessment activities, may decline to process the application further, or impose special conditions on the Applicant.

1.3.3.2 Applicants whose applications are declined by BASEC under the any of the above circumstances may make an appeal to the BASEC Appeals Panel.

1.3.4 Certification Process

1.3.4.1 The BASEC Board is the sole authority by which certification may be granted, but this authority is delegated to the Chief Executive and BASEC staff for day to day operations.

1.3.4.2 Applicants for certification against any of the BASEC Schemes shall submit to BASEC:

- a) a completed Application Form signed in the defined place to signify that the Applicant will abide by these Regulations and with the rules, regulations and

MANAGEMENT SYSTEM CERTIFICATION SCHEME REGULATIONS

requirements of the particular Scheme (copies are available on request from BASEC);

b) a copy of the requisite documentation in English as set out on the Application Form or in written requirements from BASEC.

- 1.3.4.3 For certification in relation to ISO 9001, ISO 14001, ISO 45001 and under PCR Section 2.6, applications must normally cover all operations / facilities on each site for which certification is sought.
- 1.3.4.4 BASEC will conduct a risk-based assessment of each application against a number of criteria for the purposes of determining the level of effort to be applied to the Applicant for initial assessment and also for surveillance activity to be applied once certification is issued. The criteria will include the criteria previously applied in assessing acceptability, regulations and guidance issued by accreditation authorities including IAF and UKAS, and taking account of any pre-existing certifications, operating language, the ease of conducting audits and other criteria. The outcome of this assessment will be communicated to the Applicant. The terms of BASEC's quotation may be amended at this point as a result of this assessment.
- 1.3.4.5 For PCR Section 2.6 certification and any UKAS accredited management system certification Schemes BASEC will conduct initial assessments in two stages separated by a defined period.
- 1.3.4.6 On successful completion of all initial assessment activities and the clearance of non-conformities by the Applicant, certification will be granted and Certificate(s) issued.

The initial audit for Product or Management Systems Certification is carried out in two parts (stage 1 and 2), usually back to back. If during the stage 1 audit the auditor identifies potential Major non-conformities, then the stage 2 audit may be postponed and any resulting costs may be invoiced or quoted separately). However we must point out that if during stage 1 audit concerns of potential Major NCs are raised, then stage 2 may not result in a successful outcome. In the event potential Major NCs are raised at Stage 1, the auditor will evaluate the related risks and will discuss with your representatives the positive and negative aspects. We would, in general recommend that we still continue with the stage two audit to ensure that there are no other major breakdowns. However this may result in repeating the Stage 2 or even the Stage 1 audit. For your reference the Stage 1 audit is to ensure that your documented management system complies with the basic requirements of the appropriate standard(s), to ensure that they are implemented, to ensure that you have the required production capability for the scope requested and to ensure that your organisation is meeting any applicable statutory requirements. The Stage 2 audit may be repeated if corrective actions to non-conformities are not resolved within 6 months from the issue of the audit report.

- 1.3.4.7 Certificates are valid for three years from the date of issue until formal recertification, withdrawal or amendment of certification by BASEC, and subject to the payment of the applicable fees. Certificates shall remain the property of BASEC.

A Stage 1 audit may be also required during **re - certification** of Management Systems, in situations where there have been significant changes to the management system, the organisation, or the context in which the management system is operating (e.g. changes to legislation) and any resulting costs may be invoiced or quoted separately.

- 1.3.4.8 BASEC shall keep at its offices a record in which shall be entered the name, address, trade and description of every Certified Client, the date of issue, re-issue, suspension or cancellation of all Certificates, the unique certification number allocated to the Certified Client, the scope of certification and any other particulars which BASEC may from time to time deem necessary.

MANAGEMENT SYSTEM CERTIFICATION SCHEME REGULATIONS

Summary information from this record will be made publically available on the BASEC website.

- 1.3.4.9 A Certified Client's right to any Certificate is not transferable without the permission in writing of BASEC.
- 1.3.4.10 If a Certificate is lost or inadvertently destroyed the Certified Client shall be entitled to a duplicate thereof on furnishing BASEC with a Statutory Declaration satisfactory to BASEC evidencing the circumstances of such loss or destruction and on payment of such a fee as is set from time to time.
- 1.3.4.11 Copy Certificates may be given if the Certified Client makes a written application detailing the proposed use of these copy Certificates. A charge will be made for these services.

1.3.5 Scheme Logos

- 1.3.5.1 Each Scheme has a unique logo which is depicted on the appropriate Certificate. The Scheme logos are Registered Trade Marks of BASEC, they remain the property of BASEC, and may only be used by Certified Clients in accordance with Rules published from time to time by BASEC.

In particular, the Certified Client may not use any logo in association with any product, or in connection with any laboratory test, calibration or inspection report, where any Certificate(s) held relate(s) only to management systems and a Product Certification Licence is not held for that product. In cases of blatant misuse the Certificate may be summarily withdrawn at the discretion of BASEC.
- 1.3.5.8 The Certified Client shall, upon the suspension or withdrawal of any Certificate, forthwith cease any claim of BASEC certification, and discontinue the use of the BASEC logos, certificate(s) and all advertising or promotional material which uses or makes any reference to them. The Certified Client will be liable for BASEC's charges for any such activities, and for other reasonable costs necessarily incurred by BASEC in association with the suspension.
- 1.3.9.8 Within 30 days of the start of a suspension BASEC shall conduct a review of the suspension, taking account of the actions by the Certified Client and the findings of BASEC's investigations.
